Carlos Saiz Orteu

Graduated in IT Studies as a Higher Technician in System Administration and Networking (CF GS-ASIX). Management of Java and Javascript developement, learnt in school and improved as a result of my curiosity. Currently studying React JS and Ruby.

Programming awakens my interest, that is the main reason why I am expanding knowledge in the subject through Udemy courses. Devotion for new programming languages and enthusiasm for team work and companionship. Intellectually restless.

EMPLOYMENT

July 2018 - Actually

FRONT-END DEVELOPER- ETOOLINNOVATION - DINGUS

+ Front-end development using programming languages such as React JS, jQuery and many more. Working aswell on back-end using Python and Ruby
+ Relational and no relational database use, deployment tools (Jenkins) and much more

BACHELOR'S DEGREE - IES ANTONI MAURA

SKILLS

PROGRAMMING LANGUAGES AND SOFTWARE

DATABASES I'VE WORKED WITH

ACTUALLY LEARNING

ADDITIONAL

√ Actively expanding my knowledge

√ Passion for the well-done work

√ Adaptable to teamwork

√ High level of English learned in Manchester

INTERESTS

Although my studying cycle was based on system administration, and I feel really confident working with it, I have learned programming with Java and that is where I have realized that my concerns are in that field -programming, both front-end and back-end.

Apart from the computer world, I am a sportsman and an active person. I play football throughout the year and I practise wind-surfing in Summer.

My plan while I am studying is to find a stable job in computer science.

My ideal job would be a constant challenger that makes me learn new things on a daily basis.
